

RD Certificate Number: EWS600

STX12 Water Mist System (Engineered and Pre-Engineered Solutions, inclusive of Q12i and STN12 Water Mist Nozzles)

Description

This is an assessment of the iMist STX12 Water Mist System. The system is designed to control and suppress a fire by automatically discharging very small water droplets into the air.

System operation occurs when a heat sensitive liquid filled glass bulb ruptures at a predetermined temperature discharging watermist at high pressure into the air. This fine mist remains in the air which has a cooling effect reducing the temperature in the room and causing surface wetting which helps to limit fire spread.

Scope of Registration

Due to space limitations, the Registered Detail certificate should be consulted for the full scope of this registration.

Validity

This system has been checked for compliance in accordance with English, Welsh and Scottish Building Regulations.

Registration was first issued on 19/02/18 and is valid until 19/07/20 providing there are no amendments to applicable regulations.

Issue dated 16/04/2020
